PUBLIC WORKSHOP FOR
SACRAMENTO REGIONAL 8-HOUR OZONE ATTAINMENT AND REASONABLE FURTHER
PROGRESS PLAN (SIP)
AND
ENVIRONMENTAL IMPACT REPORT (EIR)

September 10, 2008 - The Yolo-Solano Air Quality Management District will hold a workshop at the Ulatis Community Center in Vacaville on Monday, September 22 at 9:30 am for review and comment on the Sacramento Regional Draft 8-Hour Ozone Attainment and Reasonable Further Progress Plan (Plan) and Draft Environmental Impact Report (EIR). Interested parties are encouraged to provide comments on the draft Plan and draft EIR which can be viewed at <http://www.airquality.org> or a printed copy is available at the District office.

The Plan demonstrates how the Sacramento region will meet the federal Clean Air Act requirements for progress and attainment of the 1997 federal ozone ambient air quality standard. The Plan includes emissions inventory information, sets emission budgets for transportation and general conformity, provides air quality modeling results, demonstrates that attainment and progress requirements are met, and makes commitments to adopt and implement new control measures. The Plan applies to Sacramento and Yolo counties and parts of El Dorado, Placer, Solano, and Sutter counties and their incorporated cities. The draft EIR analyzes the environmental impacts from implementation of the Plan. Additional workshops are being held throughout the region with the final workshop on Thursday, September 25 at 2 PM at SMUD's Headquarters Building in Sacramento.

Written comments on the Draft Plan or Draft EIR will be accepted until 5:00 pm on October 24, 2008. Send comments to: Steven Lau, SMAQMD, 777 12th St., Sacramento, CA 95814, or fax to (916) 874-4899, or via email at sacsip@airquality.org.
